

Provider Dues Schedule

Dues are based on your total net revenues for all of your California locations/branches for previous year. Total net revenues are what you actually were paid for all services from all payers.

Total net revenues = total charges minus contractual allowances.

Example: ABC Home Health Agency is Medicare Certified. For the previous year, ABC received the following net revenues from the following payers:

Medicare	\$1,000,000
Medi-Cal	50,000
Private Payers	150,000
Total Net Revenues	\$ 1,200,000

ABC's total revenues were \$1,200,000. On the dues schedule below, ABC's total net revenues fall in the \$1,000,000 - \$1,500,000 net revenue bracket which indicates dues of \$2,150. ABC's CAHSAH dues are \$2,150.
