

Home Care Administrator Certificate Program Wrap Up

The Las Vegas Strip of Nevada is truly an exciting place to go. This year, over 156 attendees gathered to Las Vegas for the three-day Home Care Administrator Certificate Program (HCACP) on July 22-24. The three - day program consisted of three modules that included industry speakers such as Jeannee Parker Martin, Christine Lang, Vonnie Fox, Ken McNulty and Deborah Randall. The first day began with Module I, focusing on trends in health care, building strong leadership, effective ways to manage and use data and marketing strategies to achieve growth as the market shifts. On the second day, Module II provided a framework for understanding, interpreting and integrating financial and clinical performance of the organization. The speakers reviewed operational strategies, essential elements of financial management, budgeting and cash flow and how to analyze key financial statements. On the final last day, Module III reviewed the key elements of corporate compliance aimed to assist administrators in further aligning strategic, financial and performance improvement issues. Upon completing this module, attendees walked away with the knowledge to help integrate corporate compliance management with the clinical, financial and legal integrity of the organization.

Even though attendees spent over 18 hours learning how to strategically position their organizations for success in the years to come, they also found some time on the first day to network at an evening reception. Attendees also found time to cruz the Las Vegas Strip, shop at all the different stores, dine at all the fine restaurants, see a few shows and catch the night life that Las Vegas had to offer!

Congratulations to everyone who completed the course.
