Hospice Manager Certificate Program – Wrap Up

Over 30 participants from across the country gathered in Anaheim, California for three days of intensive training on hospice management. The training provided front-line supervisors, middle managers and business owners with the insights to successfully manage their hospice program. The course reviewed the responsibilities of hospice managers, the fundamentals of budgeting and reimbursement, successful coaching techniques, and important human resource practices and employment law. It also provided networking opportunities for attendees as they enjoyed an evening of cocktails and hors d'oeuvres hosted by Care West Insurance. Additionally, many of the program attendees stayed after to take the certification examinations. To view a full list of Hospice Manager Certificate Program graduates, please visit our website. If you missed the opportunity to take this course, an online version will be available to sometime in the summer.

Congratulations to all who completed the course!
